

X-Project™

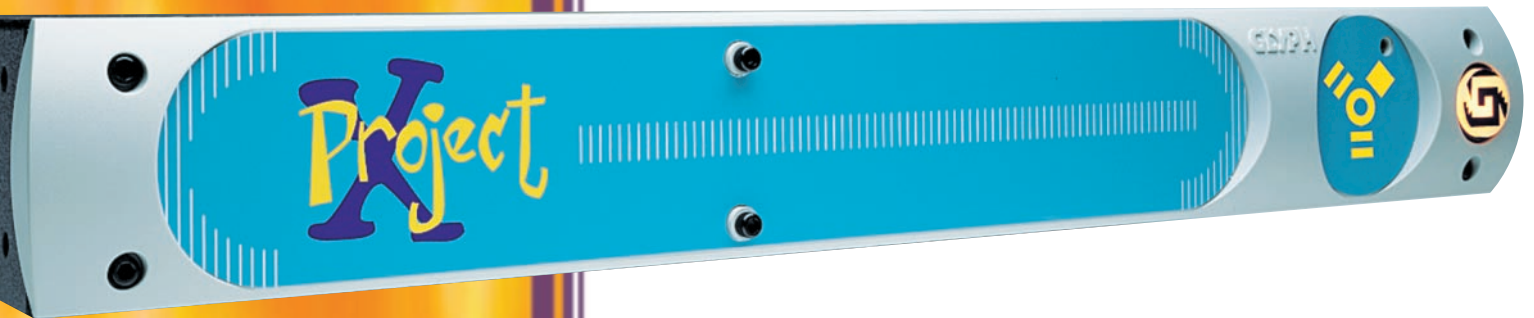

Complete your Digi 001 system

Glyph's X-Project™ sets the standard in storage solutions for project studios. The X-Project has been engineered specifically for Digidesign's Digi 001™.

X-Project is a high performance hard drive system with a dual port, 6-pin FireWire interface in a tabletop or rackmountable case that matches the Digi 001. The X-Project's reliability and ease of use allows you to unleash the full potential of your 001 system.

- Available in single/dual configurations of 40GB, 80GB and 120GB.
- Seamlessly record, overdub, mix and edit 140 to 420 minutes of 24 track, 24 bit audio at 48kHz.*
- Fully optimized solution for superior audio performance.
- Equipped with state of the art high performance, 7,200 rpm hard drives.
- Engineered with thermal sensing cooling to prolong the life of your X-Project.
- Stylized form and functionality with the speed and ease of FireWire connectivity.
- Comes complete with Glyph's outstanding 24 hour advance replace warranty at no additional charge, along with our unrivaled tech support and service.

FireWire Hard Drive

Glyph is focused on providing reliable storage for digital A/V professionals. All Glyph Hard Drives are programmed with custom mode page settings to achieve optimal performance and ensure maximum functionality and compatibility. Glyph's unrivaled service and tech support is flanked by an Overnight Advance Replacement warranty on all 9 GB and larger hard drives in single drive enclosures. A 48 hour or less turnaround is normal for all other warranty service.

Hardware Specifications

Capacity 40, 80 or 120 GB
Interface IEEE 1394, Standard 6-pin

Performance

Average Seek (Read) 8.2msec.
sustained Transfer Rate > 30MB/sec.
Multi-segmented Cache (MB) 2
Rotational Speed 7,200 RPM

Reliability

MTBF (Projected Field) 1,000,000 hours
Limited Warranty (years) Three (3) Years

Power Supply

Tabletop Switching, 100 - 240V AC Input

Environmental

Operating Temperature (F/C) 41 to 122 / 5 to 50

Physical Dimensions

Height, Width, Depth (in/cm) 6.25 x 1.88 x 9.25 / 16 x 4.7 x 23.8
Weight (lbs/kg) 3.25 / 1.5

Included with this Glyph Hard Drive

- (1) QuickStart User's Manual
- (1) FireWire cable
- (1) Power Cable
- (1) Macintosh Driver and Formatting Utilities
- (1) Warranty Registration Card

Compatibility

Computer Systems

Power PC and Wintel Compatible

Digital Audio Workstations

Digidesign - Mbox, Digi 001

* Be careful not to underestimate your needs. For maximum performance you should use a drive at least 30% larger than your estimated need. This ensures that you have the room necessary for operating overhead and extra files generated during mixing and editing. Please note: This chart illustrates the capacities required for specific bit depths, sample rates and track counts. The ability to achieve higher track counts is dependent on your DAW.
