### *Glyph Fortifies Its Popular GT Series Product Line with Four New Models*

Anaheim, CA – (Jan 20, 2005) Glyph Technologies will be showing four new storage products at Winter NAMM that offer two drives in a tabletop footprint. The new GT 060, GT 061, GT 062 and GT 060BR continue the evolution of Glyph's very popular GT Series product line, a cross-functional line of FireWire-based storage subsystems designed for professional audio and video production.

The new products follow on the heels of Glyph's success with its original GT 050 and 051 Series tabletops and come in various two-drive combinations of fixed and hot-swappable configurations.

The GT 060 has two fixed-mount FireWire drives, each with its own FireWire 400 connection. Glyph designed the GT 061 and GT 062 to support GT Key hot-swappable drives, which are compatible across the entire GT Series of enclosures.

- ✓ The GT 061 is a tabletop enclosure for one fixed-mount FireWire drive and one hot-swappable drive. Designed for workflow flexibility, it allows users to have one work drive, and one backup or transfer drive.
- ✓ The GT 062 allows for two hot-swappable GT Key drives in one tabletop enclosure allowing users to easily move files from one hot-swap drive to another.

To round out the line, Glyph developed the GT 060BR, a FireWire 800, hardware RAID 0 solution with two drives. With the same footprint as the GT 060, the GT 060BR is designed to be a backup and storage drive with blazing fast FireWire 800 speed. With no configuration software needed, and capacities of up to 800GB, the GT 060BR appears to your computer as one huge drive.

GT Series solutions are distinguished by features engineered to provide the highest level of reliability. Glyph's enhancements to existing FireWire standards, Integrity™, ensure reliability at the FireWire hot-swap interface. And, GT Series internal frames are constructed with a tri-laminate metal to reduce drive vibration and protect recordings from unwanted noise. Glyph employs Seagate hard drives exclusively in its storage products available in 80GB, 120GB, 160GB, 200GB, 250GB, 300GB and 400GB - 7200 RPM

drives, and all of the GT Series tabletops are rack-mountable with an optional rack-mount kit.

Backed by Glyph's legendary service and technical support, GT Series enclosures are covered under warranty for three years. Hard drives come standard with overnight advance replacement in the first year. The GT Series is available through authorized Glyph dealers, please check Glyph's website for details.

Glyph Technologies is based in Ithaca, New York and was founded in 1993. Glyph provides professional audio and video solutions for performance and production. For more information, Glyph can be reached at 607-275-0345 or visit [www.glyphtech.com](http://www.glyphtech.com)
