### *Glyph Begins Shipping GT Series FireWire Tabletops*

Ithaca, NY – (August 28, 2003) Glyph Technologies today announces the availability of its GT Series tabletops as part of a cross-functional line of FireWire-based storage subsystems designed for professional audio and video production. The GT Series tabletops directly address the need for portable high-performance recording tools.

The durable stainless steel chassis with internal QuietMetal™ frames make GT Series tabletops a reliable choice for audio and video projects in the studio or away. The fixed-mount GT 050 and the hot-swap GT 051 are available with 80GB, 120GB, 160GB and 200GB 7200 RPM drives. A rack-mount option is available.

The GT 051 hot-swap drive is a stand-alone solution that also works collaboratively. Its GT Key hot-swappable drive is compatible across the GT Series of enclosures. Imagine being able to record in the studio, pull the GT Key FireWire drive, and take it home to mix. Glyph's GT Series makes content more portable and expansion easy.

GT Series solutions are distinguished by features engineered to provide the highest level of reliability. Glyph's enhancements to existing FireWire standards, Integrity™, ensure reliability at the FireWire hot-swap interface. And, GT Series internal frames constructed with QuietMetal™, a composite metal technology, protect recordings from unwanted noise.

Peter Glanville, Director of Marketing, stated, "Glyph solutions reflect our understanding of customer applications. For example, we know content creators require flexibility mid-session – a drive swap may be necessary in the middle of recording. A system designed for the server industry is not made to support the drive swapping that is routine in content production. Glyph's FireWire hot-swap system, Integrity™, is designed to support drive swapping on-the-fly. Our reliable hot-swap interface enables sessions to continue with minimal interruption."

Backed by Glyph's legendary service and technical support, GT Series enclosures are covered under warranty for three years. Hard drives come standard with overnight advance replacement in the first year. The GT Series is available through authorized Glyph dealers, please check Glyph's website for details.

Glyph Technologies, wholly owned by Ithaca Technologies, LLC, was founded in 1993. Based in Ithaca, New York, Glyph provides high performance storage solutions for audio and video production.
